

## **MEDIUM OF INSTRUCTION IN EDUCATION INSTITUTIONS**

Medium of education in Russian institutes is mostly in the Russian language. In practice, most universities / institutes attempt to teach first three years of the programme in English medium while simultaneously imparting teaching in Russian language.

Students coming to study need to be prepared for this dual medium of instruction. Some institutes which claim to have dual medium language courses may not even have requisite faculty to teach in English even for the first three years.

Therefore, before seeking admission the students are advised to find out that the university follows the required guidelines.
